Thank you for purchasing a MABIS Digital Thermometer. Please read the following instructions to achieve the most accurate temperatures and safe operation. With proper care and use, your thermometer will provide you with years of reliable readings.

**NOTE:**
- F - indicates Fahrenheit mode
- C - indicates Celsius mode

**What is a “Normal” Temperature?**
Although the generally accepted “normal” temperature reading is 98.6°F/37.0°C, temperature readings can vary from 97.0°F/36.1°C to 99.0°F/37.2°C and still may be considered “normal.” Variations in temperature can be attributed to activities such as exercise, smoking, and drinking. Even an extended period of time may influence your temperature. For example, your temperature is lower in the morning than in the afternoon. Other variations may be due to the location of the thermometer reading. While the oral temperature follows the guidelines previously described, a rectal temperature is generally 1.0°F/0.5°C higher. Conversely, an axillary (under the arm) temperature will be 1.0°F/0.5°C lower.

**Using Disposable Probe Covers**
It is recommended to use disposable probe covers to prevent cross contamination. Additional probe covers can be purchased from your MABIS Dealer or with the order form provided.

**Changing the Battery**
The battery in the thermometer needs to be replaced when "L" appears in the lower right of the display. Replace the battery with a 1.55V, LR41 alkaline or SR41 silver oxide type or equivalent.

To replace the battery:
1. Slide the battery cover away from the unit.
2. Remove the battery holder screw using a small Phillips screwdriver.
3. Remove the battery holder.
4. Using a non-metal pointed tool remove the battery and insert the new battery with the positive (+) side face up.
5. Replace the battery holder screw.
6. Carefully slide the battery cap back into place.

**NOTE:** Please properly dispose the battery away from small children and heat.
